Jane Smith
Head of Docs
Acme Corp

Dear Hiring Manager,

I'm writing to express my interest in the Technical Writer position at Acme Corp. With 8+ years of experience turning complex engineering systems into clear documentation. I bring deep technical fluency and a documentation-first mindset to every team I join.

At Intel, I authored reference documentation, tuning guides, and validation test plans for server processor architectures spanning multiple Xeon generations.

I'm drawn to Acme Corp because [specific reason — their product, their docs culture, something you noticed about how they communicate with developers].

I'd welcome the opportunity to discuss how my background in engineering communication and technical documentation could contribute to your team.

Sincerely,
Nilmini Abeyratne
